Rule #1: Do not send me inappropriate, nudity, porn or ANY type of sexual content in your file.

Rule #2: Do not send your file anywhere else other than the Issues or Pull requests tab on GitHub. If you do, then I am not going to be able to find the file you sent me.

Rule #3: Do not send your file ANYWHERE ELSE other than GitHub. If you do, then I am not going to be able to find it.

Rule #4: Do not send me copyrighted images, videos or music, due to copyright rights.

Rule #5: Do not send an image or video with a lot of blood in the file.

Rule #6: Do not name your title or description of your issue or pull request on GitHub something like "DOWNLOAD MY FILE PLS PLS PLS" because I am not going to listen to beggars. I am only going to download files without those types of sentences in the title or description.

Rule #7: If you break ANY of these rules, you will be blocked by me and you will not be able to send your files to me EVER AGAIN.
